Staging environments are protected with client certificate that can be obtained from your administrator and imported into browser.

Staging environments are connected with Mimas **production** environment and Adyen **test** environment. This means that products can be purchased with test cards.

After product purchase, cards needs to be cancelled from Mimas by providing values of serial-number and batch-number from order details.

They can be obtained from API response `/api/rest/v1/voucher-orders/{order-uuid}`. For example:

```
